

AYUSH SHUKLA

COMPUTER SCIENCE UNDERGRADUATE • AI/ML ENGINEER • FULL-STACK

ayushs01032005@gmail.com linkedin.com/in/ayushshukla135/

+91 9324556442 github.com/Ayushs135 Chennai, India

EDUCATION

BACHELOR OF TECHNOLOGY, COMPUTER SCIENCE (AI AND ML)
Vellore Institute of Technology, Chennai

CGPA: 9.13
2023 – 2027

EXPERIENCE

THE CORPORATEWORMS
AI/ML ENGINEER INTERN

Remote
May 2026 – Jun 2026

- Worked on a production-grade enterprise platform, developing secure backend APIs, JWT authentication, RBAC, task management, and real-time features using **React**, **TypeScript**, **Node.js**, **Express**, **Prisma**, **PostgreSQL**, **Socket.IO**, and **Docker**.
- Improved dashboard API response time by **40–50%** by refactoring sequential database queries into concurrent operations using **Prisma Promise.all()**.
- Developed production-ready backend features while improving application security, maintainability, and overall system reliability.

PROJECTS

Project: AI Book Insight Platform [Ayushs135/AI-Book-Insight-Platform](#)
Stack: React, Django, Django REST Framework, Selenium, ChromaDB, Sentence Transformers, Hugging Face, Gemini API

- Built a full-stack AI-powered book discovery platform using **React** and **Django**, featuring **Top-5** context retrieval, automated web scraping, semantic search, personalized recommendations, and an interactive AI Q&A interface.
- Engineered a **RAG** pipeline using **Sentence Transformers (all-MiniLM-L6-v2)**, **ChromaDB**, **Hugging Face DistilBART**, and the **Gemini 2.5 Flash API** to deliver source-backed answers, semantic recommendations, and real-time summaries.
- Developed RESTful APIs for book retrieval, recommendation generation, web scraping, and AI workflows, achieving **<15ms** vector search latency, **<1.2s** AI response time, and **<250ms** summary generation through optimized context retrieval and lightweight inference.

Project: AlphaGaze: AI Stock Forecasting Platform [Ayushs135/AlphaGaze](#)
Stack: Python, FastAPI, FinBERT, Prophet, SHAP

- Improved financial sentiment classification accuracy by **50%** using **FinBERT** over a standard BERT baseline.
- Reduced forecasting **MAE by 91.11%** using a hybrid **Prophet + FinBERT** model during high-impact market events.
- Implemented a 3-day and 5-day rolling sentiment features for smoother, more stable market predictions.

Project: AnomLogBERT – Log Anomaly Detection System [Ayushs135/AnomLogBert](#)
Stack: Python, PyTorch, Sentence-BERT, Scikit-learn, Pandas

- Built a log anomaly detection pipeline using **Sentence-BERT**, **PyTorch**, and **Scikit-learn**.
- Processed **400,000+** BlueGene/L log entries using an optimized embedding generation pipeline.
- Achieved over **95%** accuracy through class balancing and comprehensive model evaluation.

SKILLS

Languages	Python, Java, C/C++, JavaScript, TypeScript
Backend	Node.js, FastAPI, Django, REST APIs, Prisma ORM, PostgreSQL, MySQL
Frontend	React.js, Tailwind CSS, HTML, CSS
AI/ML	PyTorch, Scikit-learn, Sentence-BERT
DevOps/Tools	Git, GitHub, Docker, Jenkins, Linux

CERTIFICATIONS

 AWS Certified Cloud Practitioner Amazon Web Services	 Jul 2026
 Machine Learning DeepLearning.AI & Stanford University (Coursera)	 Jun 2025
 DevOps Fundamentals IBM Developer Skills Network	 Jun 2025
 Neural Networks and Deep Learning DeepLearning.AI (Coursera)	 Dec 2025
